Hints &bout Water.

No water that has stood in open ves-sels curing the hight should be used for drinking at sooking. By exposure to the air it has lost its "aeration," and has absorbed many of the dust-germs floating in the apartment. If convenience requires water to be kept in vegets for several hours before use, it should be covered, unless the resids are tight. Wherever practical, all distributing reservoirs should be covered. Filtering always adds to the purity of water. Drinking water smould not be taken from lakes or rivers on a low level. Surface water, or water in lakes, pools, or rivers which receive the surface wash, should be avoided as much as possible. Do not drink much water at a time. Mere than two tumblers full should not be taken at a meal. Do not drink between meals unless to quench thirst, as excess of water weakens the gastric juice and overworks the kidneys. Excessive potations, whather of water or other fluid, relax the stomach, impair fits accretions, and paralyze its movements. By drinking little at a time the injury

The Value of Sleep as a Tonio.

The best possible thing for a man to do when he feels too work to carry anything through is to go to bed and sleep as long as he can. This is the only actual recuperation of brain force; because, during sleep, the brain is in a state of rest, in a condition to receive and appropriate particles of nutriment from the blood, which take the place of those which have been consumed by previous labor, since the very act of thinking burns up solid particles, as every turn of the wheel or screw of the steamar is the result of consumption by fire of the fuel in the furnace. The supply of consumed brain-substance can only be had from the nutritive particles in the blood, which were obtained from the food caten previously, and the brain is so constituted that it can best receive and appropriate to itself those nutricity particles during the state of rest, of quiet and spillness of sleep. More stimulants supply nothing in themselves; they good the brain and force it to a greater consumption of its substance, until it is so exhausted that there is not power enough left to take up a fresh

The Attack on Secretary Sherman and tioversor Royes.

Letter from Rx-Congressment Purs Cloveland Horald

The people will now demand the abole truth, and Mr. Shorman is determined it shall be made apparent. He is dioroughly in earnest and eager to meet his accusers. I have heard the whole story from his own lips, and am-certain he is able to defy his enemies, and fully vindicate his own good name. The letter written by Covernor Noyes is a manly statement of his connection with the matter, and shows how free he is from the slightest blame. Not a shadow of wrong is chargeable to him, and so far from encouraging fraud in any manner, no persistently insisted to the members of the board that Hayes would not accept the Presidency unless, upon a per feetly fair count, he was proved to be entitled to it. Should it be proven that the stories against Sherman and Noyes are hea and the lutters claimed to be written by them are forgeries, the in-ventigation will prove the uglicest thing the Democratic party ever attempted to

No disorders, excepting the most deadly forms of lung disease, involve such a tre-mendous destruction of organic, disease a those which fasten upon the kidneys .-Such maladies, when they become chron ic-sail none are so liable to assume that phase-completely wreck the system. To prevent this terrible disaster, recourse should be had, upon the first manifests tion of trouble, to Hostetter's Bitters, which experience has proved to be highly effective as a means of imparting tour and regularity to the organs of urination, as well as to the liver, stomach and howels. Another hencilcial result of this medicine, asturally consequent upon its diuretic action, is the elimination from the blood of impurities which beget rheumatism, gout, dropsy, and other maisdies. When upon a bell of sickness
You have strotched your weary frame,
When each mustle, home and fifter
is a soparste, solding pain;
When it seems the snall-like hours
Of the day are never chine,
And, the long, long eacs of night-line,
Scafeely bring the morrow s sun.

A Queer Witness.

About ten years ago a young man of New York, of vory good character, hired a horse from a livery stable to ride out to a little town about twenty miles distant. Unfortunately, about half way out the horse was taken ill and died. The livery man sued him for the value of the horse, representing that the horse had been killed by fast riding. One of the young man's witnesses (rather green, or supposed to be, and who had a pecu liar way of talking very low) was called to the box and questioned thus by the prosecutor: "Are you accusinted with the prisoner at the bar?" "Y-a-a-s" (very slowly drawled out). "How long have you been sequainted with him?" "About three years." "Well, sir, please state to the court what kind of reputation he bears as regards fast or slow-riding on horseback." "W-a-a-l, I sup-pose if he was riding with a company of persons who rode very fast, and he did not want to be left behind, he would ride fast, too. And if he was riding men tobacco, when they can buy Marbuig with a company that rode very slow, and he did not want to go ahead, slone, I suppose he would ride slow, too." Judge (much enraged)-"You seem very much inclined to evade answering questions properly. Now, sir, you have stated how the gentleman rides in slow company. Now, sir, I wish you to state how the gentleman rides when he rides alone." "W-a-a-l, having never had the pleasure of riding with him when he was alone, I don't think I can tell!"

A Queer Witness.

About ten years ago a young man of New York, of vory good character, hired a horse from a livery stable to ride out to a little town about twenty miles dis tant. Unfortunately, about half way out the horse was taken ill and died. The livery man sued him for the value of the horse, representing that the horse had been killed by fast riding. One of the young man's witnesses (rather green or supposed to be, and who had a pecu-liar way of talking very low) was called to the box and questioned thus by the prosecutor: "Are you accusinted with the prisoner at the bar?" "Y-a-a-s" (very slowly drawled out). "How long have you been sequainted with him?" "About three years." "Well, sir, please state to the court what kind of reputation he bears as regards fast or slow riding on horseback." "W-a-a-l, I suppose if he was riding with a company of persons who rode very fast, and he did not want to be left behind, he would ride fast, too. And if he was riding men tobacco, when they can buy Marbuig with a company that rode very slow, and Brus. 'Sent of North Carolina' at the same he did not want to go shead, clone, I price's" [jan1178-div suppose he would ride slow, too." Judge (much caraged) - "You seem very much inclined to evade answering questions properly. Now, sir, you have stated how the gentleman rides in slow company Now, sir, I wish you to state how the gentleman rides when he rides alone." "W-a-a-l, having never had the pleasure of riding with him when he was alone, I don't think I can tell!"
